MARKETING TEXT
<p>The Soft Grips scissors Titanium Non Stick has a cutting face with precision grinding. Their non-stick titanium nitride coating with a special formula is very remarkable. Due to the non-stick formula the blades are impassible to every kind of adhesion. Thereby it is possible to cut a wider range of materials. The blades made of stainless steel guarantee precise cuts. An increased comfort while cutting is provided by the ergonomic shaped Soft Grip handles with soft inner rings which allow a very comfortable and precise working.</p>
