Aqua fine Watercolours are made from a selection of modern high-quality pigments milled to perfection to offer optimal performance and control.

Aqua fine watercolours are rich, free-flowing transparent colours with excellent tinting strength and working properties that reliably produce beautiful, delicate washes. With a comprehensive palette of 48 colours, Aqua fine boasts the largest range of colours in its category.

Together with Aqua fine Gouache and Watercolour Ink which have been formulated to the same high specifications, Aqua fine Watercolour, mediums, brushes, pads and artboards offer artists of all levels of expertise a complete watercolour suite of perfectly compatible products.

§ For technical reasons the printed colours do not match 100% the painted colours, but deliver the best possible reference point.
